DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 39(1), drawn to a method and means for multiple processors operable for applying image effects, classified in class 345, subclass 502.
 - II. Claims 8-38 and 39(8, 23, 20, and 31), drawn to a method and means of graphics processing with multiple processors instruction based, classified in class 712, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as rendering texturing graphics and overlay operations wherein subcombination II has the separate utility of optimizing the graphics rendering by program instruction before rendering. See MPEP § 806.05(d).

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicate is proper.

Applicant is advised that the response to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
